† Tick Factor = the price increment representing 1 whole betting unit, by which P&L and both initial and variation margin is calculated. The Notional Value of your bet is Price\*Stake/Tick Factor

\* IM Factors in respect of Single Stock Equity Options on spread bets will be margined by way of GFT's Delta-Vega margining system. This system will take in to consideration any positions the customer may also hold in respect of spread bets in the underlying equity. Please refer to the below and Clause 3.2 of the Spread Bet Terms.

Our services include products that are traded on margin and carry a risk that you can lose more than your initial deposit. The products may not be suitable for everyone - please ensure you fully understand the risks involved. 'Tradefair Financials' ('Tradefair') is a trading name of GAIN Capital - FOREX.com UK Limited and is authorised and regulated by the Financial Conduct Authority. FCA No. 190864. Revised 25 November 2014.

Margin = net Delta Margin + net Vega Margin

net Delta Margin = Stake x Delta x Underlying Margin  
net Vega Margin = Stake x Vega x Volatility x VolFactor

where:  
Underlying Margin = Underlying GFT Price x underlying IM Factor  
Volatility = GFT implied volatility for the specific option  
VolFactor = A multiplier. Set at 25 for all equity options

All Options will be expired at a price of zero regardless of whether the Option is "In The Money", "At The Money" or "Out of The Money".

If you are long the UK Equity Option, you have until 17:00 London time on the relevant last dealing day to telephone the GFT Dealing Desk to advise us if you wish to Exercise or Abandon the Option. ‡

If you are long the EU Equity Option, you have until 18:00 Central European time on the relevant last dealing day to telephone the GFT Dealing Desk to advise us if you wish to Exercise or Abandon the Option. ‡

If you are long the US Equity Option, you have until 16.15 New York Time on the relevant last dealing day to telephone the GFT Dealing Desk to advise us if you wish to Exercise or Abandon the Option. ‡

‡"Exercise" and "Assigned" means to take a new position in GFT's underlying daily funded spread bet market at the Strike Price of the Option, and the Option will be settled at a price of zero.  
"Abandon" means NOT to take a new position in GFT's underlying daily funded spread bet market at the Strike Price of the Option, and the Option will be settled at a price of zero.

In the event that you do not contact GFT within the times stated above: GFT will determine whether the option is "In The Money", "At The Money" or "Out The Money" using the price of the Underlying market at 16.30 London time for UK Equity Options, 17:30 Central European time for EU Equity Options, and 16.00 New York Time for US Equity Options, on the relevant last dealing day.

1. A long (short) "In The Money" Call Option will be settled at a price of zero and will result in you holding a new long (short) position in GFT's underlying daily funded spread bet market for the equity in question, opened at the Strike Price of the Option.
2. A long (short) "In The Money" Put Option will be settled at a price of zero and will result in you holding a new short (long) position in GFT's underlying daily funded spread bet market for the equity in question, opened at the Strike Price of the Option.
3. A long (short) "Out of The Money" or "At The Money" Call Option will be settled at a price of zero.
4. A long (short) "Out of The Money" or "At The Money" Put Option will be settled at a price of zero

#### Options on un-borrowable Single Stock Equities

For clients with In-The-Money short calls on un-borrowable Single Stock Equities the client should buy the amount of stock due from the option assignment/exercise BEFORE the expiry time.

If the client has not bought the amount of stock required then GFT will buy this back at market on behalf of the client and book this to the client's GFT account.

For clients with In-The-Money long puts on un-borrowable Single Stock Equities the client should buy the amount of stock due from the option assignment/exercise BEFORE the expiry time.

If the client has not bought the amount of stock required then GFT will only exercise the options to match the amount the client has bought in the underlying. This could cause losses to the client.

NOTE:  
In some cases (if the underlying stock price is very close to the strike level) the client will not be certain how much needs to be bought by the time the market closes. In these cases the client must ensure the maximum expected amount of stock is bought back, i.e. the client should buy enough stock to cover the full amount due from the option assignment (as if the short call was to finish above the strike level. Or as if the long put was to finish below the strike level).

When buying an option the margin is capped at the maximum potential loss. In most cases this is the price multiplied by the size you have traded. However if you have bought an option and you also have any underlying positions in the same underlying market then we will use our standard delta vega margin calculation which in some cases may result in margin being greater than the two positions being margined separately.

The products may not be suitable for everyone - please ensure you fully understand the risks involved. 'Tradefair Financials' ('Tradefair') is a trading name of GAIN Capital - FOREX.com UK Limited and is authorised and regulated by the Financial Conduct Authority. FCA No. 190864. Revised 25 November 2014.

Please note that very large individual positions are subject to additional margin. This will typically apply to positions of \$50m or more on currency pairs, indices and major commodities, and positions of \$2.5m or more on minor commodities.

Should you have a position that is subject to an additional margin requirement we will contact you to make arrangements to cover it. This increased margin requirement will continue to apply at GAIN Capital's discretion, until the position size decreases and remains materially below the threshold for a sustained period. Partially closing the position will not automatically reduce your margin requirement.

If you have any questions about margin on large positions please contact our sales team.
